

SUMMER WORK PROJECT RECORD SHEET

Project Name: Wyo-Link communication site

Project Number: 7

Project Location: Rendezvous Bowl adjacent to Tram Tower #5

Description: A new wireless communications facility would be installed to house two microwave dishes for use by the state of Wyoming. The building would be 624 feet in size and located approximately 450 feet south west of the top of Rendezvous Mountain. The new structure would be made to look like a mountain cabin by utilizing a stone foundation and wood like siding. This new facility will also provide garage space for a snow cat in the basement of the structure.

Anticipated Activities: This project consists of building a custom wood frame structure on a masonry block foundation. A short, temporary access road into the sight will be constructed as a part of this project. Heavy equipment will be used to excavate material out for the foundation. It is currently planned that JHMR will perform all of the functions of a general contractor. The intent is to start construction in late June and complete the project by November 1.

Site Plan Sketch (or attach map): See specific Mountain Project Request.

Comments: As a part of this project, a new replacement primary power line will be installed new summer in the mountain access road to provide high quality, reliable electricity to the facility.
