## Phase 2 Lifts

Lift 9 is a fixed grip, quadruple chairlift with a rated hourly capacity of 1,800 passengers per hour and a vertical rise 945 feet. This lift services skiers in the advanced skill class level. Lift 9 can service approximately 390 skiers per day. The trail system for this lift is comprised of 6 runs totaling 28 acres.

Lift 10 is also a fixed grip, quadruple chairlift with a proposed rated hourly capacity of 1,800 passengers and a vertical rise 1,005 feet. This lift services terrain up to the 10,240-foot elevation and increases the Las Vegas Ski and Snowboard Resort's total vertical drop to 1,655 feet. This lift services skiers ranging from advanced through expert skill classes. Lift 10 can service approximately 410 skiers per day. A total of 19 acres of ski trails are associated with Lift 10.

At the completion of the proposed Phase 2 development, the ski area will be able res of ski trails. The proposed lift specifications for Phase 2 are listed in Table IV.13.
