*Italicized text* indicates either previously-approved, unimplemented terrain, or planned terrain.

Creating a new beginner/intermediate pod alters the dynamics of terrain distribution (on a percent basis) resort-wide. Table 6 and Chart 7 compare the existing and upgraded distribution of terrain by skier ability level. Resort-wide, the upgrading plan shows will induce movement toward meeting Mt. Rose's skier/rider market for beginner and novice terrain, with a resulting surplus of intermediate terrain.
