

SNOWMAKING

Squaw Valley is stepping it up for the 2006/07 winter season with an increase in snowmaking. The Papoose beginner area at the bottom of the mountain and the popular Gold Coast intermediate area up top will both see increased snowmaking. Squaw Valley is expanding snowmaking efforts from 400 acres and 10% of terrain to 600 acres and 15 % of terrain for the 2006/07 season.
